

DRESTER BOXER COMBO BY HEDSON

Drester Boxer Combo

With the Drester Box Combo gun cleaners it's possible for both solvent-based and water-borne cleaning. Drester Boxer combo cleaning offers three models, a compact-size unit and two full-size units.

- Suitable for solvent-based and water-based cleaning
- Automatic agitation when flocculating
- Compact or full-size models

The Drester Boxer Combo is available in three models:

- Drester Boxer Double Combo
- Drester Boxer Triple Combo
- Drester Boxer Quattro Combo

USER FRIENDLY

Foot-operated pumps, for hands-free operation and to reduce the solvent consumption. The gun cleaner is also equipped with air pressure regulator and water trap for durability. The specifically designed spray nozzles gives an optimal wash power

AUTOMATIC

Equipped with an Auto box – a compact, effective and flexible washing compartment with integrated fluid channels, which makes less-cluttered space and the power of the pump results in more efficient cleaning, meaning that less clean solvent is needed per gun. The Auto box is located at the back of the unit, allowing a spacious manual washing sink at the front. At the same time as a gun is being cleaned automatically in the Auto box, manual cleaning is available, with a flow-through brush and a clean rinse nozzle

PATENTED

All Drester Boxer by Hedson gun cleaners are featured with a patented magnetic gun holder which simplify the cleaning and use of the gun cleaner. The magnetic gun holder pulls the trigger to open the paint channel and fixates a gun in seconds, in one simple step. It fixates the gun in a position where the gun's air channels are protected, facing downwards, so there is no risk of solvent entering the air channels
