

DRESTER CLASSIC 8000 BY HEDSON

Automatic gun cleaner with automatic and manual clean rinse

Drester 8000 by Hedson is an automatic gun cleaner designed for use with conventional or water based paints. The machine cleans automatically with a circulating solvent. Rinsing can be done either automatically or manually. During the wash cycle, air is blown through the spray gun's air channels to keep these free from solvent and fuzz. The air powered machine is also available as a two-gun model. Designed for use with conventional or water-based paints

- Strong cleaning power and fully automatic
- Manual wash facility gives flexibility

HIGH QUALITY

The machine is equipped with two Drester Teflon Diaphragm pumps, which ensures high quality results as well as reliability

OPTIMIZE WORKFLOW

Rinsing can be done either automatically or manually to optimize the workflow

FLEXIBILITY

A unit that cleans automatically with a circulating solvent. Rinsing can be done either automatically or manually. The manual wash facility gives flexibility
