DRESTER X-SERIES BY HEDSON

Hedson proudly present the latest concept in our Gun Cleaner portfolio – the X-series, a robust gun cleaner developed for workshops and industry with extra heavy workload.

X-SERIES MANUAL

X-SERIES AUTOMATIC

X-SERIES DOUBLE

THE MOST ROBUST GUN CLEANER ON THE MARKET

Automatic cleaning of spray guns is faster than cleaning by hand, allowing more cars to be painted each day. That gives an efficient cleaning process in the work shop and improves the productivity. Automatic cleaning provides also a consistent result as opposed to cleaning by hand.

The robust Drester X-series by Hedson are aimed towards workshops and industries with a heavy work load. The working platform is made of welded stainless steel, which makes it extremely robust and durable. The high-quality gun cleaner have an excellent cleaning performance and washes all types of spray guns. The model is ergonomic with less depth and includes spray gun storage, with up to 7 spray gun storage.

X-SERIES FEATURES THREE MODELS

The X-series features three models to fit every customer need; one single with manual work station, one single with automatic work station and one double with two work stations, both manual and automatic.

Product Launch

IRT COMBI IR-UVA BY HEDSON

Achieve the highest possible efficiency in your workshop with our latest innovation from IRT by Hedson - a unique product with curing of both shortwave IR and high intensity UV radiation in the same device.

UNIQUE DRYER

The body- and paint shops trend towards more minor damages on cars, demands more flexible products and technics. With our new combined dryer, curing with shortwave IR and high intensity UVA radiation, is possible from the same curing device. An efficient curing device in terms of flexibility, saving space, time and money for the workshop.

FEATURES

The two technics in this dryer can be run individually or in sequence and is featured with 15 (IR:12, UV:3) pre-programmed programs for water and solvent based paint material, from putty to

clear coat. One cassette includes 4 IR lamps and 1 UVA lamp. The dryer is equipped with a time counter for the life length of the lamps and the IRT control unit includes program selection.

HEDSON ACADEMY

Hedson Academy training is up and running. The latest trainings were held in Norway and Mexico. In Norway, the UV-

Safety for our curing equipment was on the agenda and in

Mexico there was two sessions both with focus on our gun cleaners and IR curing equipment's.
