

HERKULES HEXACOMB TURBO BY HEDSON

Reliable and efficient vacuum system for multiple users,
perfect for the body and paint shops

— PERFORMANCE ABOVE ALL —

HIGH EFFICIENT AND USER FRIENDLY

A vacuum system that are designed for self-installation

The Herkules Hexacomb Turbo by Hedson is a vacuum system for multiple users with double connection for power supply, adjustable compressed air connection and extraction. It combines recent product design, high efficiency and a user friendly handling.

Inside the Herkules Hexacomb Turbo by Hedson there is plenty of space for tools, sanders and much more. The vacuum system has also a swivel arm integrated, which make it easier to reach out to several working places in the preparation area.

The turbine in the vacuum system with its 64 dB is more silent than a modern vacuum cleaner and the Hexagon energy head or alternatively the multifunctional terminal will provide work places with vacuum power, air pressure and electricity.

The dust bags are easy and safe to remove through a sliding plate and dust bag holders.

The Herkules Hexacomb Turbo by Hedson is available as wall mounted solution or as a cabinet model. The cabinet model can also be embedded into a wall.

Art.no. T2W

- Easy and safe removal of the dust bags
- Adjustable air pressure with manometer
- Powerful turbine but also silent, due to optimized insulation

Art.no. T2S

Art.no. T2M
