DRESTER GP 24 LE MANS BY HEDSON – A FULLY AUTOMATIC WHEEL WASHER

Hedson proudly present the latest member to the Grand Prix series of wheel washers – Drester GP 24 Le Mans by Hedson, an advanced and fully automatic wheel washer.

The fully automatic cleaning process increases the productivity in the workshop and reduces the demand for manpower. The machine works automatically and without interruption until the last wheel is cleaned. Load the wheels on a trolley, dock it to the machine and push the start button – the machine will take care of the rest. With the trolleys there is no need for extra lifts.

The Drester GP 24 by Hedson washes all kind of rims with outstanding cleaning performance. It is the fastest and most rational wheel washer with an attractive design and sophisticated but easy to use software.

FOR EVEN BETTER CLEANING PERFORMANCE

All Drester by Hedson wheel washers uses plastic granules and water in the cleaning process. The Drester cleaning method with granules is an environmentally friendly and time efficient cleaning technology. No uses of detergents or chemicals are needed.

Together with the new wheel washers Hedson presents a new granule mixture – Drester DoublePower by Hedson – for an even better cleaning performance and minimal impact on the environment. Hedson also launch a new practical granule filter – Drester Granule filter by Hedson – suitable for all Drester wheel washers. The filter reduces the loss of granules into the drain, which saves both money and the environment.

“We are now introducing the most effective and fully automatic wheel washer in the world. Improved washing technology together with a new formula for shot medium will result in a great washing result and with a minimum of water consumption and impact on the environment.

BACKGROUND

Hedson Technologies was established in 1999 as a merge between IRT and Drester. Both IRT and Drester were Swedish companies, IRT with a history from 1967 developing infrared dryers and Drester from 1978 developing spray gun cleaners. In 2005 Hedson acquired the German company Herkules who has a history from 1974 developing lifting equipment. With user experiences, innovative technology and well-planned concepts, all three brands have one thing in common, to deliver products that meets the high demands of professional customers. In 2014 Hedson Technologies was acquired by Mellby Gård Innovation och Tillväxt AB, a solid well-known and privately owned Swedish industry investor.
