

IRT CURING

IRT CURING EQUIPMENT

Save space, time and money

A wide selection of high-quality, user-friendly, space saving short-wave infrared (IR) and ultraviolet (UV-A) IRT dryers.

A combination of 50+ years of curing know-how, high-end parts, sophisticated software and inhouse/third party/user tests will cure your material 100%, every time.

IRT mobiles and rail dryers provide reliable, high quality results with advanced curing technology that is easy to use. They are designed for the workshop, to save floor space and speed up the repair job process.

IRT provides maximum productivity in the body shop, always considering health and safety regulations.

- Controlled heat distribution
- Large curing areas
- Short curing times

IR CURING, DRY IN MINUTES

IRT IR dryers use gold coated reflectors for superior heat transfer management.

PAGE 4

UV-A CURING, DRY IN SECONDS

IRT UV-A dryers have an outstanding intensity, developed in cooperation with market leading paint manufacturers.

PAGE 10

IF YOU WANT IT ALL

The combination of IR and UV-A curing makes our IRT COMBI range unique.

PAGE 18

Gold coated reflectors	Infrared	Ultraviolet UV-A	Ultraviolet UV-A LED	Wear UV safety glasses	Powerful ventilation	Mobile dryer	Rail dryer	Distance control for preset programs	Non-contact temp. monitor	Battery operated	Cord operated	Handheld

IR HANDHELD & MOBILE DRYERS

Efficient, safe and quick IR drying

Handheld and IRT mobile dryers that cure all base coat and paint materials. Easy access with flexible arms that are easy to adjust.

HIGH-EFFICIENCY REFLECTORS

ADVANCED, USER FRIENDLY SOFTWARE

PAGE 4

UV-A HANDHELD & MOBILE DRYERS

High quality UV-A curing for all workshops

IRT UV-A curing with high intensity in a variety of models. Battery operated and handheld UV-A LED models and UV-A high efficiency pressure lamp mobiles.

OUTSTANDING INTENSITY

HIGH QUALITY DURABLE UV-A CURING

PAGE 10

RAIL DRYERS

Space savers with improved workflow

IRT Rail dryers are wall- and ceiling installations for prep stations and spray booths with IR- and/or UV-A availability from all angles.

NO LOOSE CABLES

MAINTENANCE FREE

PAGE 21

ARCH DRYERS

Improved throughput of vehicles in the workshop

In-booth and prep station curing that saves energy, time and space. IRT Arch dryers automatically move and identify the chosen car panel, using only the corresponding IR-lamps necessary.

CURES VEHICLES AND LOOSE PANELS

FULLY AUTOMATIC AND EASY TO USE

PAGE 24

IRT INFRARED CURING

Careful consideration of bodyshop heating requirements

To provide the best heat transfer possible, all IRT infrared (IR) dryers are equipped with unique gold coated reflectors.

IRT reflectors provide a superior heat distribution and a large curing area. Short-wave IR provides full heat immediately and penetrates deep into the paint. The paint cures from the inside and out without retaining solvents and moisture.

Heat loss to the air is minimal and all energy is transferred to the surface. IRT IR dryers irradiate the object and do not heat the surrounding air, thereby minimizing energy losses.

- Efficient use of energy
- Short drying times
- Large curing area
- High quality curing results

IRT CURING TIMES

Putty	5-6 min
Filler, bright/dark	7-15 min
Water based paint	4-6 min
Base coat	4-8 min
Top/clear coat, plastic filler	4-15 min
Plastic top/clear coat, soft cure	5-17 min
Final boost	2-4 min

The curing time is extremely short. Times above apply to the PcAuto range. Add a minute or two for other models.

SIMPLIFIED DIAGRAM

Short-wave heat cures from the inside and out without retaining solvents and moisture.

ADVANCED AUTOMATIC DISTANCE AND TEMPERATURE CONTROL.

Look for these symbols for temperature measurement (pyrometer), laser circle and digital distance sensor. The surface temperature is continuously measured and the effective output regulated in a split second for optimal curing results.

IRT 1

Use handheld or attach to a stand (optional), for minor paint and panel work

- One lamp - output power 1 kW
- Gold coated reflector
- Best curing at 30 cm from the surface

DIMENSIONS

Handheld (LxHxD)	418x196x66 mm
Handheld weight	1,8 kg
Stand (HxW)	1450x350 mm
Stand weight	10 kg
Curing area*	0,17 m ²

* Curing area at a distance of 30 cm

IRT 1 PREPCURE, HANDHELD

ADVANCED AUTOMATIC DISTANCE AND TEMPERATURE CONTROL:

Pyrometer temperature measurement with laser circle indicator and digital distance sensor. The surface temperature is continuously measured and the effective output regulated in a split second for optimal curing results. Also allows for 3-step drying cycles.

Example of a 3-step drying cycle, used for panel bonding and construction glues etc.

IRT 4-1 & 4-2 PCAUTO

High output dryer, easy to use with advanced curing technology, up to 110°C/230°F

- Automatic temperature control and distance measuring
- 15 process programs (3 customizable)
- Laser circle indicates where temperature measuring takes place
- Electronic distance sensor signals correct distance to curing surface

DIMENSIONS	IRT 4-1	IRT 4-2

800419	16 A	12 kW	20 A	440-480V, 3 PH, NA ETL	50-60 Hz
800614	26 A	12 kW	30 A	440-480V, 2 PH, NA ETL	50-60 Hz

PCAUTO:

Place 60 cm from curing surface.
Laser circle sample area is Ø 30 cm (pyrometer ratio 1:2).
The pyrometer determines an average temperature reading in this area.

DTP:

Place 40-60 cm from curing surface.
Laser circle sample area is Ø 3-4 cm (pyrometer ratio 1:15).
The pyrometer determines an average temperature reading in this area.

IRT HIGH TEMPERATURE DRYERS

For spot repair and curing of paint material up to 200°C/390°F

- Automatic temperature control and distance measuring
- 15 process programs (customizable)
- Cures typical spot repair, A-B-C pillars and thicker steel materials

IRT 424 DTP 4-1

IRT 464 DTP 4-2

Please contact your local retailer or IRT sales contact for assistance with a suitable IRT DTP dryer.

IRT 4 HI-BAKE

HiBake is a *MANUAL* alternative to the DTP model, with 50% flash-off, 100% fullbake.

ULTRAVIOLET (UV-A) CURING

UV-A dryers with outstanding curing performance

All IRT UV-A models have an outstanding intensity to achieve the best curing result, even curing thick filler layers.

IRT UV-A high efficiency pressure lamp mobiles are equipped with one or two 1000 W UV-A lamps which cure UV-A material in just a few minutes. The ozone-free lamps and protective glass filters out the UV-B and UV-C radiation. A safety switch prevents the lamps from igniting if the glass breaks. Our UV-A LED models are extremely efficient, curing UV-A primer and filler in seconds.

- Outstanding intensity
- High-quality and durable curing
- Developed with market leading paint manufacturers

HANDHELD MODELS, UV-A LED

Battery- and cord operated models available in 365 nm and 395 nm. High-intensity, flexible and precise UV-A LED curing for specific wavelengths.

MOBILE MODELS, UV-A PRESSURE LAMPS

Mobile, long-life, low maintenance, high efficiency UV-A curing with large curing area.

SAFE UV-A CURING

Third party UV safety report (EN62471) for operator safety. UV-LED modules and low pressure bulbs are installed safely behind protective glass. Ozone-free low pressure bulb lamp design.

SAFETY FIRST

Always use UV safety glasses when handling UV-A light. We supply a pair with each delivered unit.

IRT
SYSTEM

IRT UVA 1-3

Curing with high efficiency UV-A lamps

- Curing on vertical surfaces
- One UV-A lamp with protective glass
- Curing time is regulated with an electronic timer

IRT UVA 1 PREPCURE 3

Part no.	Power	Fuse	Voltage	Frequency
800604	1 kW UV-A	10 A	230V, 1 PH, EU	50-60 Hz
800668	1 kW UV-A	10 A	230V, 1 PH, AUS & ARG type 1	50-60 Hz
800671	1 kW UV-A	15 A	230V, 1 PH, NA	50-60 Hz

DIMENSIONS

Stand height	1531 mm
Cassette vertical range (height)	60-1310 mm
Width	694 mm
Weight	60 kg
Curing area*	1,0 x 1,0 m

* At a distance of 55 cm

IRT UVA 1-4

High-quality, durable UV-A curing

- Flexible stand enabling curing of roofs on vehicles
- One UV-A lamp with protective glass
- Curing time is regulated with an electronic timer

DIMENSIONS

Stand height	1448 mm
Cassette vertical range (height)	35-2200 mm
Width	1224 mm
Weight	65 kg
Curing area*	1,0 x 1,0 m

* At a distance of 55 cm

Part no.	Power	Fuse	Voltage	Frequency
800621	1 kW UV-A	10 A	230V, 1 PH, EU	50-60 Hz
800669	1 kW UV-A	10 A	230V, 1 PH, AUS & ARG type 1	50-60 Hz
800672	1 kW UV-A	15 A	230V, 1 PH, NA	50-60 Hz

IRT UVA 2-4

Large curing area with two UV-A lamps

- Flexible stand enabling curing of roofs on vehicles
- Two UV-A lamps with protective glass
- Curing time is regulated with an electronic timer

IRT UVA 2 PREPCURE 4

Part no.	Power	Fuse	Voltage	Frequency
800622	2 kW UV-A	10 A	230V, 1 PH, EU	50-60 Hz

DIMENSIONS

Stand height	1448 mm
Cassette vertical range (height)	35-2200 mm
Width	1224 mm
Weight	81 kg
Curing area*	1,8 x 1,0 m

* At a distance of 55 cm

IRT UV-A LED CURING

WHY UV-A LED CURING?

UV-A curing with Light-Emitting Diodes (LED) generates, near-instant curing intensity, cold curing the painted surface without heating up the surrounding air.

Overall maintenance is reduced and the elimination of a warm-up cycle reduces technician down time.

WHAT IS A PHOTO INITIATOR (PI)*?

The energy in the UV-A light polymerizes and cures the UV-A material. The chemical reaction is triggered by a photo initiator and the speed of the process is determined by the energy or intensity of the UV-A light source and the wavelength.

WHY THIRD PARTY INSPECTION?

Third party testing confirms that a product exceeds quality, safety, sustainability and performance of applicable standards for a global product.

Two independent 3rd party inspectors (RISE and Intertek) review our products and our user instructions.

BENIFITS OF INDUSTRY COOPERATION?

By working closely with major paint manufacturers, crucial user experience and expectancy are added to our product development.

*Illustrating the correlation between PI wavelength, curing speed and UV-A light intensity.

SmartCure is available in wavelength alternatives 365/395 nm, based on paint manufacturer requests. It is prepared for future adaptations and can be retrofitted from 395 nm to 365 nm.

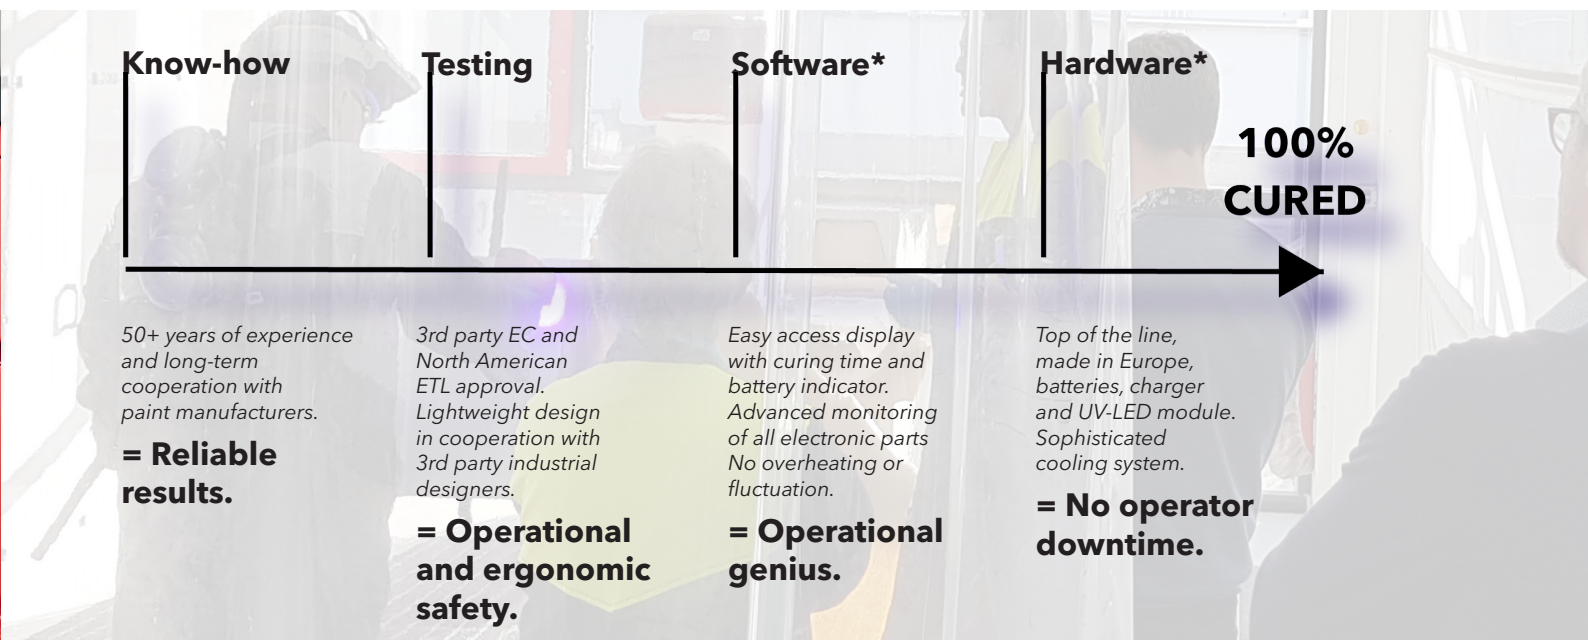

100% CURED

Non-fluctuating curing cycle

The key to high quality, reliable results is in maintaining a non-fluctuating intensity through the complete curing cycle.

Therefore, measuring and comparing light intensity is tricky, showing only a moment of truth. Once the primer/filler surface is sealed, you need to rely on the inside being cured.

With IRT, a combination of curing know-how, high-end parts, sophisticated software and inhouse/third party/user tests will cure your material 100%, every time.

*Example, SmartCure

IRT TESTING

We have tested UV-A fillers, primers and clear coats from every major paint manufacturer and offer solutions for all.

Flexible handheld/fixed cord solutions for the static work place. Battery operated lightweight handheld options for accessibility that eliminates downtime in the work shop.

Our UV-A LED options are available for 365 nm and 395 nm.

IRT UV-A

We have long experience in a leading position on the international curing and drying market.

Our UV-A range of products for body shops and manufacturing industries comes in all shapes, super light handheld tools and easy positioned heavy duty mobiles.

Also checkout IRT's range of UV-A pressure lamps combined with IRT infrared technique, available as mobiles and rail systems for a wider UV-A spectrum.

IRT UV SMARTCURE

200 W UV-A LED battery operated curing

SmartCure comes with two exchangeable batteries and cures UV-A filler and primer in seconds, available for 365 nm/ 395 nm.

IRT UV SmartCure has an extremely powerful output, offering market leading peak/average light intensity.

By combining a powerful UV-LED-module, advanced cooling technology and light weight batteries, reliable, highly effective, non-fluctuating UV-curing is achieved.

Advanced electronics minimizes the risk of machine damage by active ventilation and by monitoring the temperature of both electronics and LED-module. This provides safe operation with efficient steady state voltage LED-output and current control regulation.

- Available for 365 nm/ 395 nm
- Weighs just 1 kg, for excellent work comfort
- High intensity is constant until battery is at 0%

ELIMINATE DOWNTIME

With two exchangeable 18V lithium-ion batteries and 45 minute charging time, IRT UV SmartCure is always available.

RELIABLE CURING RESULTS

By working closely with leading paint manufacturers IRT enables reliable paint processes in all bodyshops.

ULTIMATE CURING GUIDE

To obtain peak performance, work at appr 100 mm from surface.
 @ filler/primer thickness 80-120 µm,
 Ø 160 mm is cured in appr 10 sec.
 (Peak light intensity >350 mW/cm², average >250 mW/m²).

WALL BRACKET
Magnetic wall bracket, included as standard.

DUST COVER
Optional protective dust cover with magnets, art no 715193.

UNIQUE BEAM SPREAD
24 pieces of domed LED's create a unique beam spread over the complete curing area.

HARD CASE*
Optional heavy-duty case, art no 800806.

CARDBOARD BOX*

DISPLAY GUIDES THE WAY
All fillers, primers and clear coats have different curing cycles.

LOW MAINTENANCE
Replaceable filter protects electronics inside, art nr 715074.

SUPER LIGHT AND ERGONOMIC
Tested to withstand high impact. Flame resistant plastic shell reinforced with 25% glass fiber and 3 mm scratch and solvent resistant tempered safety glass. Light-weight comfort and easy to use with a precise trigger switch.

IRT UV SPOTCURE

400 W UV-A LED flexibility

IRT UV SpotCure is a robust, easy-to-use, UV-LED curing unit designed for many hours of high efficiency curing. High-intensity, handheld flexibility.

Low energy consumption and a long LED life time keeps the cost per curing job very low. With built-in fans, the UV-A LED's and internal components are kept cool, reducing the risk of overheating the units.

This extends the lifetime of the lamps to beyond 20,000 hours, with a minimal loss of curing power over that time.

- High intensity curing with 400 W power
- Powerful ventilation, long life, low maintenance
- Retrofit your UV SpotCure with a stand

ULTIMATE CURING GUIDE

To obtain peak performance, work at appr 100 mm from surface.
 @ filler/primer thickness 80-120 µm:
 Ø 200 mm is cured in appr 20 sec.
 (Peak light intensity >120 mW/cm², average >70 mW/m²).

SPOTCURE

Magnetic bracket for flexible handheld curing.
 Retrofits to stand, if requested.

1-2. SPOTCURE ON STAND (OPTIONAL)
 Combined fixed/handheld curing. With the optional stand, SpotCure handles larger curing areas.

2.

Bracket (WxHxD)	245x370x270 mm
Bracket weight	5,54 kg
Stand (WxHxD)	450x1450x600 mm
Stand weight	13 kg
Cord length	8 m

COMBINATION OF IR AND UV-A CURING

Our best in class IR and UV-A dryers in one

The IRT COMBI dryer is 2 in 1 - saving space in the workshop while allowing complete flexibility.

The combination of short-wave infrared and UV-A radiation makes this mobile dryer unique. One cassette includes 4 IR lamps and 1 UV-A lamp.

The UV-A lamps have an outstanding intensity to achieve the best curing result. The infrared lamps are mounted in gold coated reflectors, reflecting up to 97 % of the short-wave radiation.

The IRT COMBI features 12 IR and 3 UV-A pre-programmed programs for water and solvent based paint material, from putty to clear coat. Available as flexible mobiles and easy-gliding rail dryers.

- High-quality and durable curing
- Space saving curing solution
- Short-wave IR drying and UV-A curing

SAFE UV-A CURING

The ozone-free lamps and the protective glass filters out the UV-B and UV-C rays. If the glass breaks or is missing, the light has a safety switch preventing the lamp to ignite.

FLEXIBILITY AND EFFICIENCY

Space saving infrared and UV-A drying techniques which can be run individually and in sequence.

SAFETY FIRST

Always use UV safety glasses when handling UV-A light. We supply a pair with each delivered unit.

IRT 4-1 IR-UVA

Mobile dryer with unique combination of IR and UV-A techniques

- One cassette with 4 IR lamps and 1 UV-A lamp
- Featured with 12 IR- and 3 UV-A pre-programmed programs
- Easy to position

DIMENSIONS

Stand height	1450 mm
Cassette vertical range (height)	80-2240 mm
Width	1230 mm
Weight	70 kg
Curing area	
- IR*	1,1 x 1,5 m
- UV-A**	1,0 x 1,0 m

* Curing area at a distance of 60 cm, on black sheet metal
** At a distance of 55 cm

IRT COMBI 4-1 IR-UVA

Part no.	Power	Fuse	Current	Voltage	Frequency
800605	IR: 6 kW UVA: 1,2 kW	10 A	IR: 9 A UVA: 3 A	380-420V, 3 Ph/PE	50-60 Hz

IRT 4-2 IR-UVA

Mobile dryer with unique combination of IR and UV-A techniques

- Two cassettes, each cassette equipped with 4 IR lamps and 1 UV-A lamp
- Featured with 12 IR- and 3 UV-A pre-programmed programs
- Easy to position

DIMENSIONS

Stand height	1450 mm
Cassette vertical range (height)	80-2240 mm
Width	1230 mm
Weight	85 kg
Curing area	
- IR*	2,2 x 1,5 m
- UV-A**	1,8 x 1,0 m

* Curing area at a distance of 60 cm, on black sheet metal
** At a distance of 55 cm

IRT COMBI 4-2 IR-UVA

Part no.	Power	Fuse	Current	Voltage	Frequency
800606	IR: 12 kW UVA: 2,4 kW	16 A	IR: 16 A UVA: 6 A	380-420V, 3 Ph/PE	50-60 Hz

IRT 4-10 IR-UVA

Rail dryer with IR and UV-A radiation

- One cassette with 4 IR lamps and 1 UV-A lamp
- 12 IR- and 3 UV-A pre-programmed programs
- Unique combination of IR and UV-A curing

IRT COMBI 4-10 IR-UVA

Part no.	Power	Fuse	Current	Voltage	Frequency
800618	IR: 6 kW UVA: 1,2 kW	Max 100 A	IR: 9 A UVA: 3 A	380-420V, 3 Ph/PE	50-60 Hz

DIMENSIONS

Installation height	2250-3150 mm
Cassette vertical range (height)	80-2240 mm
Weight	70 kg
Curing area	
- IR*	1,1 x 1,5 m
- UV-A**	1,0 x 1,0 m

* Curing area at a distance of 60 cm, on black sheet metal
** At a distance of 55 cm

IRT 4-20 IR-UVA

Rail dryer with IR and UV-A radiation

- Two cassettes, each cassette equipped with 4 IR lamps and 1 UV-A lamp
- 12 IR- and 3 UV-A pre-programmed programs
- Unique combination of IR and UV-A curing

IRT COMBI 4-20 IR-UVA

Part no.	Power	Fuse	Current	Voltage	Frequency
800619	IR: 12 kW UVA: 2,4 kW	Max 100 A	IR: 16 A UVA: 6 A	380-420V, 3 Ph/PE	50-60 Hz

DIMENSIONS

Installation height	2250-3150 mm

** At a distance of 55 cm

WORKSHOP CUSTOMIZATION

Please contact your local retailer or IRT sales contact for assistance with customization for your workshop.

IRT RAIL SYSTEMS

Tailor-made for prep area and spray booth

Operational safety with integrated cables

The IRT Rail System can be equipped with any number of IRT dryers, all hanging on easy-glide, self-balanced cassette arms.

With the IRT Rail System you can quickly maneuver the dryer into the perfect curing position, reaching all parts of the vehicle, without obstructing loose cables. The IRT Rail System comes in a variety of shapes and sizes and is customizable to suit any type of workshop.

OPERATIONAL SAFETY

High quality with closed rails and integrated cable system extends lifetime and creates a maintenance free environment.

LOWBUILT TO SUIT WORKSHOPS

Long experience with rail system installation has resulted in this extremely lowbuilt construction.

FOR PREP AREA & SPRAY BOOTH

Our standard sidehung cross rail system fits most workshops. Customized solutions are also available to fit all prep areas and paint booths.

SIDEHUNG CROSS RAIL SYSTEM Standard.
(Max length cross rail 7 m (22'11"))

UNDERHUNG CROSS RAIL SYSTEM

WALL RAIL SYSTEM

RAIL SYSTEM

IRT RAIL DRYERS

Easy gliding and self-balancing dryers

SAFE AND CLEAN

As the electric power supply is integrated in the rails, there are no loose cables dragging along the floor disrupting work and stirring up dust.

IRT CONTROL SYSTEM

User-friendly advanced system, pre-programmed to monitor the curing process.

DUST & SURVEILLANCE SYSTEM

Optional, use in enclosed spray booth or combined spray and dry booth. Security control of unit and protection of the cassettes.

IRT 3-20

Adapted for prep station and spray booth

- Two cassettes - each cassette with 3 IR lamps
- Electronic distance sensor
- Computerized curing process

IRT 3-20 PCD

Part no.	Current	Output power	Fuse	Voltage	Frequency

IRT FLEXICURE

Shorter curing times in the prep area

IRT FlexiCure moves over the chosen panel automatically, curing from the inside out, preventing solvent to be trapped inside the coating, ensuring fast and high quality curing.

Accelerated curing in the prep area, both automatic and manual, static and dynamic. Simply choose the desired panels to be dried and start the curing process thereby contributing to a cost-effective and environmental friendly process.

- Flexible installation in prep area with IRT Rails
- Tiltable zone for adjusted effect
- Requires very little parking space

TIME SAVING IN THE PREP AREA

IRT FlexiCure is installed in a standard IRT Rail System and accelerates curing of water- and solventbased base and clear coats.

4 CURING ZONES

Each zone is equipped with shortwave infrared lamps, gold coated reflectors and pyrometer. 3 IR lamps/zone with a total power of 38 kW.

COST EFFECTIVE PROCESS

IRT FlexiCure saves energy by only activating the necessary IR lamps using pyrometers and distance sensors.

WORKSHOP CUSTOMIZATION

Please contact your local retailer or IRT sales contact for assistance with customization for your workshop.

TECHNICAL DATA

Rated voltage	Nominal frequency	Full load current	Main disconnect fuse	Sound pressure level	Sound power level	Curing temp. (curing surface)	Ambient temp. (during operation)	Weight FlexiCure excluding rails
400-480 V ~3Ph/PE ± 5%	50-60 Hz	55 A	65 A	≤ 70 dB (A) at 1 m	≤ 70 dB (A) at 1 m	Max. 170°C	Max. 40°C	150 kg

IRT POWERCURE

Shorter curing times in the spray booth

IRT PowerCure drastically shortens curing times for all paint materials with a minimum of energy used.

IRT PowerCure turns your traditional booth into a rapid curing booth. The vehicle is ready to move forward in minutes. Selection of panels and paint type is done quickly and easily on the touch control panel. The vehicle and loose parts can be cured in the same drying cycle.

IRT PowerCure can be installed in new spray booths as well as be retrofitted in existing spray booths. Calculate 1,2 m for IRT PowerCure and another minimum 8 meters to pass over the vehicle and angle front/back.

- Easy to retrofit in spray booth (min 9,2 m)
- Reaches front/back of vehicle with angling wings
- Adapts to paint material, size and shape of vehicle
- A typical coating is cured in 10 minutes or less

WORKSHOP CUSTOMIZATION

Please contact your local retailer or IRT sales contact for assistance with customization for your workshop.

TECHNICAL DATA

Frequency	Installed Power	Voltage	Part no.
50-60 Hz	54 kW / 63 A (20 lamps à 3 kW less 6 kW supply voltage compensation)	400 V, 3Ph ~/PE	800410* IRT PowerCure Single 800490* IRT PowerCure Double

*) Incl. Surveillance System

EVEN HEAT DISTRIBUTION

The front and back of the vehicle are easily cured with the wing angled towards the painted surface. The shape and positioning of the reflectors give an even heat distribution.

LESS ENERGY CONSUMPTION

IRT PowerCure detects the starting position and saves energy by only activating the necessary IR lamps. Simply choose the desired panels to be dried and start the curing process.

ENERGY CONSUMPTION

Typical energy consumption, clear coat on base coat, medium sized vehicle, medium colour shade:

Front wing	6 min	0,95 kWh
Door	5 min	0,95 kWh
Front wing + door	10 min	1,6 kWh
Hood	7 min	1,5 kWh
Hood + 2 wings	9 min	2,8 kWh
Complete car	26 min	15,8 kWh
