Image "IRT UV SpotCure"

The most powerful handheld UV LED curing lamp just got stronger

Since its launch in 2018, IRT UV SpotCure holds the market leading position on cord operated handheld UV lamps for curing of UV primers and fillers.

As more UV fillers and primers are launched, IRT UV SpotCure still maintains the highest light intensity on the market, which is significant to determine fast and exact UV-curing results. To offer enhanced operator experience and extended product lifetime, SpotCure is being re-launched with several new features.

SpotCure is now equipped with filters to keep the inside free from overspray and dust which extends product lifetime dramatically. To avoid restricted airflow caused by the filter, ventilation is upgraded to a more powerful, twin fan solution.

This heat management upgrade keeps the LED-module temperature securely regulated which extends lifetime even further.

SpotCure also has a new flexible power cable ideal for harsh environments with excellent mechanical resistance to impact and abrasion.

IRT by Hedson Managing Director Linus Ekfeldt explains: "Since we know the power cable is often exposed to accidental rough handling, quick connectors have been added to both ends of the power cable for easy replacement, should an accident happen. Time is money, and we know how important it is to avoid downtime in any body shop, big or small. The new cable also adds increased flexibility while curing, resulting in even better ergonomics for the operator."

SpotCure is supplied with a magnetic wall bracket and with an optional flexible stand and timer.

IRT has produced high-quality curing and drying equipment based on shortwave infrared and UV technique for 54 years. IRT is part of Hedson Technologies AB, with a global network of distributors assisting on a national level with installation and service hubs in many countries. Hedson Technologies offer a wide selection of high-quality products with well-known trademarks IRT curing equipment, Drester gun cleaners and Herkules lifts.
